

**URGENT SAFETY NOTICE
ACTION REQUIRED**

ElectriQ Gas Hobs

We have become aware that some ElectriQ gas hobs may be fitted with a connector that is at risk of failing in certain circumstances whether the hob is in use or not. Should this occur, this could lead to a gas leak or fire.

How do I know if I have an affected model?

The model number can be found either on the rating label under the hob or in the instruction manual. (Please see images below for reference)

Should neither be readily accessible, or you have concerns you might have an affected model it's important that you contact us straight away to arrange for a free inspection and repair by a RGI registered engineer. You can contact us on 12239611 between 9am – 5 pm 7 days a week or visit www.electriq.co.uk to check if their appliance is listed as one of the hobs affected and to arrange a free inspection and repair by a RGI registered engineer.

What should I do next?

If you are using an affected appliance with Liquid Petroleum Gas (LPG), in a caravan, leisure Home or motorhome, please disconnect it from the LPG cylinder immediately. Please contact us straight away to arrange for a free inspection and repair by a RGI registered engineer. You can contact us on 12239611 between 9am – 5 pm 7 days a week or visit www.electriq.co.uk, please have your model number or order reference to hand.

If you are using an affected appliance in a permanent domestic home (whether using mains gas or LPG), you can continue to use your hob while you are waiting for the engineer's visit. But please contact us to arrange a free inspection and repair by a RGI registered engineer on the same number above.

While you are waiting for the engineer's visit, please continue to keep in mind the important Gas Safety Tips, which you can view here: <https://www.gassaferegister.co.uk/gas-safety/home-gas-safety/home-gas-safety-tips/>. These include installing an audible CO alarm, ensuring adequate ventilation, and only using gas appliances for their intended purpose.

If you smell gas or are concerned that your product poses a risk, you should contact the Gas Networks Ireland on **1800 20 50 50**. The Gas Networks Ireland is responsible for operating and maintaining the gas network in the Republic Of Ireland, no matter which supplier you are with.

Model Number Location

Gas Hobs affected have the following model numbers.
