## Integrated Single DishDrawer™

With over a decade of DishDrawer™ manufacturing, we are proud to introduce the latest edition. Continuing with the ergonomically superior design, we have found new ways to make your dishwashing experience easier, adjustable racks on the side of the drawer and folding tines ensure complete versatility and adaptability. Follow this up with a range of wash programmes and independently operated drawers and you have the ultimate kitchen clean up companion.

### DishDrawer™ Technology

#### SmartDrive™ Wash Function

The unique brushless DC motor acts as both a wash pump and a drain pump, which means less moving parts and greater reliability. The pump brings water into the spray arm, which rotates at different speeds depending on the wash cycle selected to deliver a superior clean and better dish care.

#### Nine Wash Options

All DishDrawer™ dishwashers feature nine wash programmes tailored to different washing requirements: Rinse, Fast Eco, Fast, Delicate Eco, Delicate, Normal Eco, Normal, Heavy Eco, Heavy. The range of settings enables DishDrawer™ to wash everything from fine glass and crystal to heavily soiled pots and pans at the touch of a button. Primary and secondary controls provide a simple interface for programme selection and operation while the delay start setting means the dishes can be done when it's most convenient.

#### Superior Filtration

One of the challenges in all dishwashers is a robust filter system that removes debris and avoids blocking. The kidney filter and overmoulded filter plate creates a firm seal to ensure that debris does not enter the wash mechanism and cause backflow. It is designed to be removable for easy and hygienic cleaning.

#### Adjustable Racking

DishDrawer™ includes a range of flexible and adjustable racking options for different wash requirements. The flexible cutlery basket can be customised for different utensils and incorporates a separate small item container for easy loading and unloading. Pitch adjustable folding tines allow greater flexibility to customise loads. Tines can be folded flat to accommodate a full load of pots and pans or fold up to hold delicate glassware and crystal. Pitch adjustable racks can accommodate normal plates or simply slide and the rack can conveniently stack deep bowls. Wine glass holders ensure delicate glasses are secure throughout the wash and all side racking is fully adjustable to accommodate short stem and long stem glasses. Added retainer clips are ideal for holding chopping boards and plastic containers in position during wash cycles.

#### Safe

DishDrawer™ dishwasher incorporates unique safety features such as Child Lock which both locks the drawer to prevent opening as well as disabling the buttons. In addition it includes three stage flood protection; the high strength hose withstands water pressure several times greater than normal, overfill detection cuts the water supply if limits are exceeded and the back-up switch activates the drain pump to remove any excess water.

Flow Through Detergent Dispenser

The DishDrawer™ detergent dispenser ensures that undissolved detergent does not drop into the tub, but instead is mixed as the machine fills with water. This not only cleans each load better but also reduces the possibility of damaging delicate items such as aluminum, cutlery or porcelain glazes.
