A natural clean with steam

Cleaning after cooking needn't be a chore. Humidity inside the oven creates steam to loosen otherwise stubborn grease and residue left on its surfaces. So you can achieve a natural clean, effortlessly.

Absolute accuracy, every time

The clean glass display with touch buttons gives you even more control over your cooking. The timer is activated by entering start/stop through the LCD screen. Meaning you can expect absolute accuracy - even if you momentarily step away from your oven.

Cooked evenly everywhere

With this oven, using energy efficiently also means cooking efficiently. It has a new convection system called Hot Air, which ensures hot air circulates evenly throughout the oven cavity. The result is that the oven heats up faster and cooking temperatures can be reduced by up to 20%, saving you both time and energy

Pre-heat quicker. With Fast Heat Up

Make more of your time with the Fast Heat Up setting, pre-heating the oven 40% quicker than conventional models. Enjoy minimal waiting before beginning a bake, for great results on your schedule.
