

# SF9390X1

## classic

90cm "Classic" Multifunction Oven, Finger Friendly  
Stainless Steel & Eclipse Glass  
Energy rating A+

EAN13: 8017709234614

- 10 functions inc circulaire with upper and lower element

**Automatic programmes: 20**

**Other functions: Defrost by time, Defrost by weight, Proving**

**Large LCD display**

**Extra wide oven**

- Air cooling system
- Closed door grilling, Tilting grill

**Double fan**

- Easy clean enamel interior
- 5 cooking levels, Metal side supports
- 2 x halogen lights
- Triple glazed door

**Vapor clean function**

- Oven GROSS capacity: 123 litres
- Oven NET capacity: 115 litres
- Usable cavity space dimensions (HxWxD): 371x724x418mm

**Standard accessories:**

- Partially extractable telescopic shelf set
- Extra deep tray (40mm deep)
- Chrome shelf
- Grill mesh
- Nominal power: 3.10 kW

## Functions

## Options

- **PPR9** - Rectangle refractory pizza stone without handles
- **GT1T-2** - Pair of fully extractable telescopic guides
- **GT1P-2** - Pair of partially extractable telescopic guides
- **PALPZ** - Folding Pizza Shovel

## Main oven

### Lower heating element only:

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

### Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

### FAN WITH LOWER ELEMENT/ CIRCOGAS:

In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning. In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time.

### Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

### Circulaire:

The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

### ECO:

The combination of the grill, fan (if present) and lower element is particularly suitable for cooking small quantities of food.

### Circulaire with upper and lower elements:

The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

### Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

### Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.
