## Important information

- Please read these instructions thoroughly and retain for future reference
- Always check for pipes and cables before drilling

# Component including

1. Niche
2. Cutout template
3. Double sided tape

## Technical Drawing

## Tools Required

Double Sided Tape  
(Included)

Silicone Adhesive

Level

Measuring tape

Scissors

Masking tape

Pencil

Drywall saw

# Installation Notices

- The niche requires that the section of the wall has a minimum depth of 101mm to be installed.

## Installation Instructions

### Step 1

- Trace the opening to be cut by cutout template. Ensure that the tracing is leveled. Cut this section of the wall out with a drywall knife or grinder in the case of a tiled surface.

### Step 2 (optional)

- To ensure an optimal waterproofing, it is recommended to install drywall panels on each side of the opening (while respecting cutout template) and glue a waterproof membrane inside.

### Step 3

- Using the double sided tape provided. Apply the tapes at the back of the niche edge and ensure to position them toward the inside of the alcove.

**Tip:** Before the next step, test the alcove inside the opening to make sure that the dimensions are correct.

### Step 4

- Remove the remaining protective film from the double sided tape. Apply silicone adhesive all around the alcove.

### Step 5

- Pull off the protective film. Carefully insert the alcove into the opening, making sure that it is level and that a proper pressure is applied to allow the double sided tape and silicone to adhere.

**Tip:** Clean the silicone excess only when fully dry.

### Step 6

- Use masking tape to hold the alcove in the place against the wall. Once the silicone is fully dry, remove the masking tape and seal the alcove all around with silicone.

# Maintenance guide

· We recommend the use of a wet cloth and soft soap to maintain surfaces. The use of brushes, abrasive products, or any other materials such as steel-wool pads or products in aerosol metal containers can damage niche surfaces.

Important: Remove soap and cosmetic residue as well as excess water between uses. prolonged exposure to certain products may leave marks on the surface.

## For stainless steel finish

- The use of microfiber cloths is recommended.
- Use cleaners for stainless steel only.
- To prevent corrosion, avoid any contact with steel accessories

## For powder coated finish

- Use conventional non-abrasive cleaners.
- Avoid contact with nail remover, depilatory cream and paint solvents.
