Parts / Diagrams

Wall plug

Wall screw

Plastic washer

Brass washer

Screw cap

Tools required

Spirit Level

Electric drill

Drill bit
($\Phi 8$)

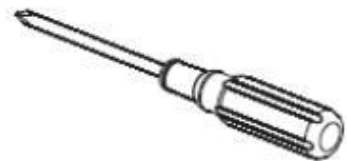

Tape measure
(3m~5m)

Silicone

Pencil

Screwdriver

Cabinet installation:

The room in which the unit is being installed, must be well ventilated.

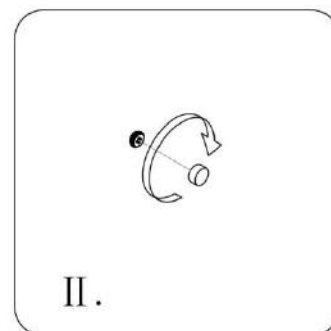

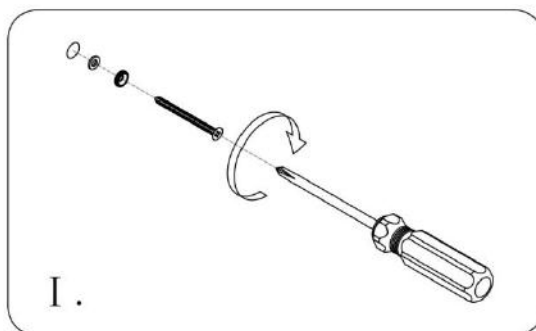

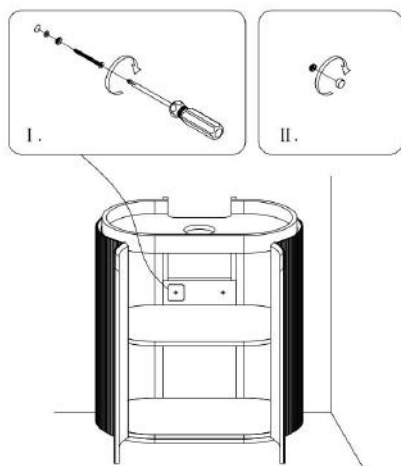

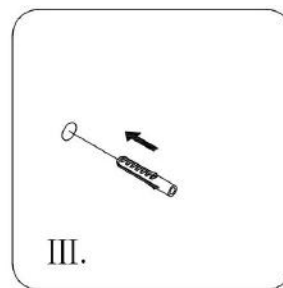

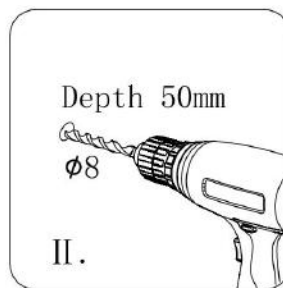

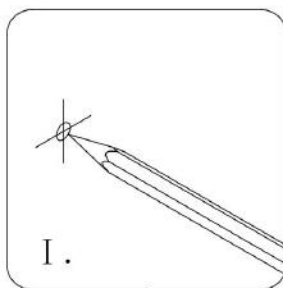

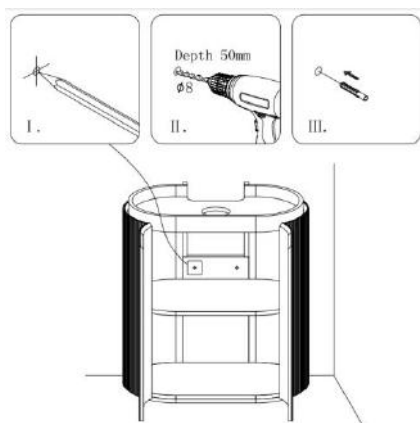

Please check for pipes and cables prior to drilling, after the position of the brackets is marked, drill the holes in the wall, using an 8mm drill bit(not supplied), to a depth of approx 50mm.

Insert the wall plugs and tap flush with the wall surface and secure the wall brackets into place.

Check the brackets fitted to the unit are fully tightened.

Floor Standing Installation:

Units must be secured to the wall

Countertop installation:

Please note for a countertop installation, the basin hole has been drilled and there is no tap hole. Before installing the countertop, confirm your selected basin will fit the countertop. If you need to match a tap, please drill a tap hole according to your tap and the drilled edge must be sealed.

After the basin hole and tap hole are confirmed, the countertop can be fitted to the unit, by applying a bead of silicone between the unit and countertop to provide a seal and fixing for the countertop to the unit.

Also, run a bead of silicone along the back edge of the base where it meets the wall.

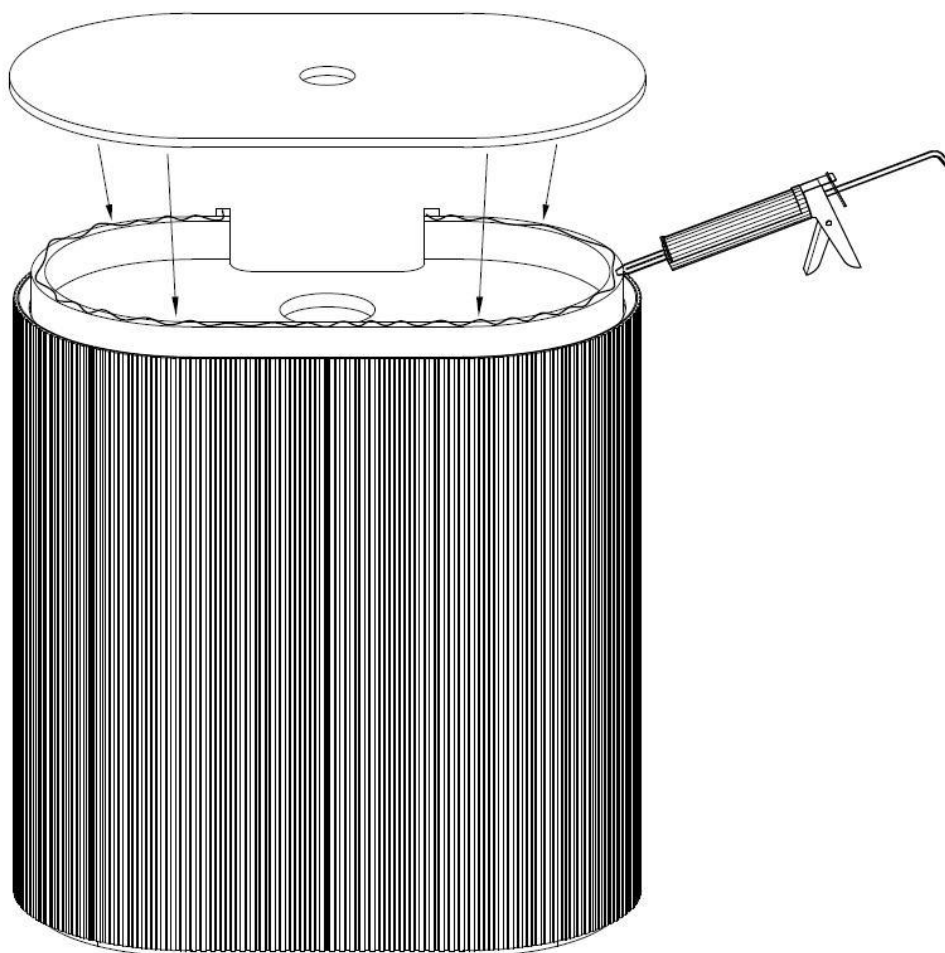

After silicone has been applied, it must be left for 24 hours to dry.

Maintenance and Cleaning

Wipe the product clean and dry regularly, especially when the product is subject to steam or splashes.

Do not use harsh chemicals or materials on the product, as this will damage the product and invalidate your guarantee.

To clean and maintain the product, wipe using a clean damp cloth and wipe dry with a soft cloth.
