Tools Required

Tools for installation (not supplied)

| | | |
|---|---|--|
|  Electric drill |  PTFE Tape |  Spirit Level |
|  Wrench |  Screw driver | |

Safety Notice:

Prior to drilling into walls, check there are no hidden electrical wires,cables or water supply pipes. Always wear protective equipment such as safety glasses and hearing protection whilst using power tools.

Installation Instructions

- * The maximum overall height is 2400mm.
- * The minimum overall height is 1800mm.

Installation Instructions

Cistern

The underside of the cistern can be a maximum of 2050mm off the floor.

Fix the cistern brackets to the wall first. Put the cistern on top of the brackets and mark the positions of the holes on the wall. Screw the cistern to the wall using the fixing screws and washers supplied through the fixing holes in the back of the cistern. Ensure the tank is firmly secured to the wall. The high level pipe kit can be cut down if required.

Note: Any screws and plugs supplied are suitable for stone/brick walls only. If in doubt consult an expert.

Flush Pipe

1. Insert the flush pipe into the bottom of the cistern and tighten the compression fitting. To ensure a good seal use PTFE tape, around the thread. Move the cover over the base of the flush valve and move the O-ring so it stays in position.

2. Insert the flush pipe and flush cone into the inlet hole on the pan. Ensure the pipe is fitted securely into the pan. Use a small dab of silicone to hold the metal cover in place.

3. Use the pipe bracket to fix the pipe to the wall. Mount this bracket about halfway up the flush pipe.

Maintenance & Cleaning

Maintenance

All of the maintenance measures requires you to access the internals of the cistern tank and of the water supply to be turned off. Please refer to the instruction guide supplied with your cistern for further guidance.

Please note: Before carrying out any internal maintenance , turn off the water supply.

Cleaning

To maintain the surface finish of your product, wipe clean after every use, using a clean damp cloth, a mild detergent mixture can be used. Do not use abrasive cleaning agents or materials which can strip and scratch the surface; the use of these agents or materials can invalidate your guarantee.
