Installation

It is advised that the installation of these valves is carried out by a fully qualified plumber or advice is obtained for a suitable qualified person or plumber.

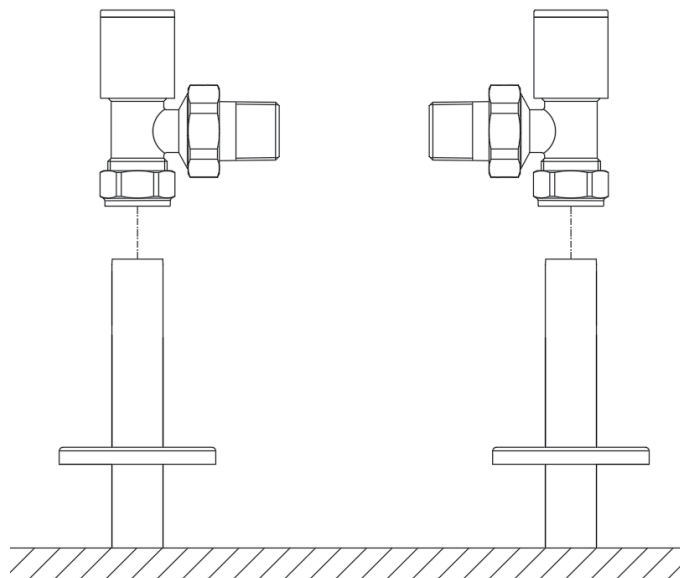

Please note: Before starting any installation, turn off the water supply.

First, ensure that the radiator is clean from debris before you start to install the valves and in conjunction with the valves, follow the radiator or towel rail installation as per the manufacturer's instructions.

1. Measure and establish the required length of the pipe needed then make a mark. Using a Pipe slice, cut the excess length ensuring a clean cut.

2. Put the pipe over the floor piping and then slide the cover plates over the pipes. Proceed to fit the radiator valves and radiator to the floor piping, refer to their respective instructions for guidance if needed.

Cleaning

To maintain the surface finish of your product, wipe clean after every use, using a clean damp cloth, a mild detergent mixture can be used. Do not use abrasive cleaning agents or materials on the product surface.

If any harsh chemicals come into contact with the surface of the product during bathroom cleaning, rinse off immediately, wipe clean and dry.
