

**CAP600AWS**  
**Compact Air Purifier**  
*with Plasma Ionizer*

**USER MANUAL**

**Thank you for choosing this innovative Air Purifier.**  
**Please read this user manual before using the product**  
**and keep it safe for future reference.**

### **SAFETY INSTRUCTIONS**

#### **Important!**

- Carefully read the instructions before operating the unit
- This appliance is for indoor use only.
- Rating: This unit must be only connected to a 220-240 V / 50 Hz earthed outlet.
- Installation must be in accordance with regulations of the country where the unit is used.
- If you are in any doubt about the suitability of your electrical supply have it checked and, if necessary, modified by a qualified electrician.
- This air purifier has been tested and is safe to use. However, as with any electrical appliance - use it with care.
- Disconnect the power supply from socket when changing the filters or cleaning the unit
- Avoid touching any moving parts of the appliance.
- Never insert fingers, pencils or any other objects through the guard
- This device is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities. It is also not intended for use by those with a lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.
- Do not leave children unsupervised with this device.
- Do not clean the unit by spraying it or immersing it in water. Use a damp cloth only
- Do not clean with strong chemical agents or other abrasive materials.
- Never connect the unit to an electrical outlet using an extension cord. If a power outlet is not available, one should be installed by a qualified electrician.
- Never operate this appliance if the cord or power supply is damaged. Ensure the power cord is not stretched or exposed to sharp object/edges.
- A damaged power supply should be replaced by the manufacturer. Never extend or attempt to change the power supply lead
- Any service other than regular cleaning or filter replacement should be performed by an authorized service representative. Failure to comply could result in a voided warranty.
- Do not use the appliance for any other purposes than its intended use.
- Avoid removing the power cord while unit is still in operation. This could cause electrical damage
- Never use the power supply as a switch to start and turn off the air purifier unit. Use the provided ON/OFF switch located on the control panel.
- Always place the unit on a dry and stable surface.
- The use of accessory attachments that have not been approved by the appliance manufacturer is not recommended, as this may result in fire, cause an electric shock and/or cause personal injury.
- Ensure hands are fully dried before plugging or unplugging the appliance.
- The appliance should not be installed in laundry or wet rooms.

#### **Energy Saving and Unit Safety Protection Tips**

- Do not cover or restrict the airflow from the outlet or inlet grills.
- For maximum performance and safety the minimum distance from a wall or objects should be 20cm.
- Keep the filters clean. Under normal conditions, filters should only need cleaning once every two weeks (approximately). Since the filters remove airborne particles, more frequent cleaning may be necessary, depending on the air quality.

#### **Information on Indoor Pollutants:**

**VOC (Volatile Organic Compound)** – VOC's come from motor vehicle exhausts, gasoline vapour and chemical solvents - like paints and glues. VOC's cause irritation to the eyes and or nose as well as causing headaches, nausea, and even potential damage to the central nervous system. Pressed wood furniture, newly decorated rooms, paint and cleaning solvents are common sources of VOC's.

**MOLD / FUNGUS** – These can affect our respiratory system and cause allergic reactions, like a runny nose, eye and throat irritation, headaches, fatigue and aggravation of asthma.

Other indoor pollutants include - bacteria, viruses, dust mites and pollen, etc.

**Emissions from electronic office equipment** – Many studies, including those from EPA and the University of California Berkeley, have reported that emissions from office equipment like, computers and printers etc. include VOC's, ultra-fine particles and ozone.

These emissions have been proven to have a negative effect on the health of many people.

### Using HEPA filters and Plasma Ionization

An effective HEPA filter is absolutely necessary to remove particles, even at a microscopic level; it ensures that the particles are not spread. Plasma Ioniser will sterilise the air and reduce bacterial growth.

### Operation Instructions

1. The device can be placed in an upright or horizontal position, (see pictures 1 & 2).
2. Keep the air inlet and outlet clear while in operation do not place any heavy objects on top of the unit at any time
3. Plug the supplied AC/DC adapter into a socket and insert the DC into the device (see picture 3)
4. The standby (red) light will be on. Press the On/Off switch button to start the fan. The green light will be on once the unit is operating.
5. Press the Plasma Ionizer button to turn the ionizer on (and off).
6. When the ioniser is in operation, the blue light will be illuminated.

(1) Horizontal Position

(2) in Upright Position

(3)

### Replacing Filters

(1)

(2)

(3)

1. Unplug the AC/DC Adaptor from the socket.
2. Open the Sliding Door by pressing the arrow mark and then sliding outward
3. To replace the Filters just pull them out from the slot. When putting new filters in, ensure the "front" side is facing outward.
4. To remove the Pre-filter for cleaning: pull the filter out and remove the spongy pre-filter. Grip lightly at both ends of the filter and pull it out gently.
5. Wash the spongy pre-filter under running water, leave it dry in naturally and put it back on with front side facing up.

(Note: High performance filters are not washable, keep them dry at all times and vacuum regularly.)

6. The device should not be turned on until the sliding door is closed completely.

## APPENDIX

**Disposal:** Do not dispose this product as unsorted municipal waste. Collection of such waste must be handled separately as special treatment is necessary.

Recycling facilities are now available for all customers at which you can deposit your old electrical products. Customers will be able to take any old electrical equipment to participating civic amenity sites run by their local councils. Please remember that this equipment will be further handled during the recycling process, so please be considerate when depositing your equipment. Please contact the local council for details of your local household waste recycling centres.

## TECHNICAL DATA:

<b>Rated Input</b>	12 V, 6 Watts
<b>Frequency</b>	50HZ
<b>DC Power Input</b>	100-240V, 600mA
<b>DC Power Output</b>	12V DC 1000mA

## **UK PRODUCT SUPPORT**

**[www.appliancesdirect.co.uk](http://www.appliancesdirect.co.uk)**

**Please, for your own convenience, make these simple checks before calling the service line.**

**If the unit still fails to operate call: 0871 620 1057 or complete the online form**

1. Is the unit plugged into the mains?
2. Is the power supply OK?
3. Switch the unit off and wait three minutes to see if the issue is resolved. Restart the unit.

**Office hours: 9AM - 5PM Monday to Friday**
